Grille

Walls & Ceilings

Grille panels are excellent visual design elements for great-looking ceilings and walls.

Grille ceiling installation is easy using our attachment clip system to 15/16" HD T-Bar grid, and both backered and doweled panels are 100% accessible. Wall panel direct attach installation is also very easy with screws. Standard rail dimensions and spacings are available on our website.

Grilles can be stained to match a control sample and perimeter trim options are available. The system offers design flexibility with five grille styles available. Grilles may be paired with acoustical liner for enhanced acoustics.
