

Timeless. Classic. Design. One Strip - Many Patterns

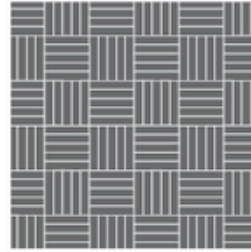

Traditional flooring patterns are difficult to install. Our flooring features patented click technology, making it less labor-intensive.

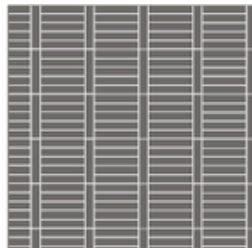

Herringbone

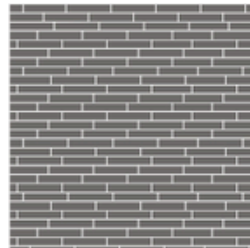

Brick

Basket Weave

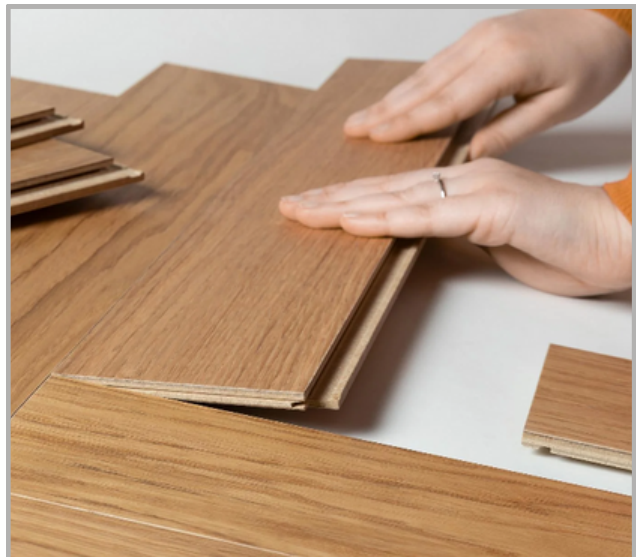

Ladder

Floating

Click means no glue, nails and no gaps between the panels.
As a result, the installation ends with perfect alignment and minimizes time and materials.
This floor is invented for a floating installation, which reduces issues of doming, creaking and gaps between the panels.

Simply a dream!

Planet-Approved. Engineered to Last.TM
